(54) Title: HIGH-PRESSURE DISCHARGE LAMP

(57) Abstract: The invention relates to a high-pressure discharge lamp 1 comprising at least one burner 2 having a discharge space, and comprising two electrodes extending in the discharge space, a gas filling in the discharge space comprising at least an inert gas and a metal halide mixture, a tubular outer bulb 3 having two ends, the burner 2 being attached, at least at one end, to the outer bulb 3, said outer bulb 3 comprising at least one light-absorbing means 5 and at least one interference filter 6, and an interference filter 4 being arranged on or in at least a part of the burner 2.
